**Commissioning Strategy 2019-2022**

**Ambition**
Across Nottingham and Nottinghamshire, we seek both to increase the duration of people’s lives and to improve those additional years, allowing people to live longer, happier, healthier and more independently long into their old age.

**Strategic Priorities**
1. Enable prevention of avoidable illness
2. Enable population to stay healthy and independent
3. Promote and develop strong communities
4. Promotion of signposting to good advice and information
5. Role redesign and embedding new roles
6. Delivery of strong primary, community, social and care services

**Our key system impacts**
We will support the transformation ambitions of Nottingham and Nottinghamshire ICS through the delivery of:

1. **Improved health and wellbeing**
   - Giving everyone a good start in life and enable health lifestyles, preventing avoidable illness and improving outcomes

2. **Increased independence, care and quality**
   - Enable healthy and sustainable communities

3. **Effective resource utilisation**
   - Enable population to make informed decisions regarding their health, and for providers to work together to improve health and care services

4. **Sustainable service delivery**
   - Strategic commissioning aligning around population health need with collaborative delivery from all system providers of sustainable health and care services

5. **Deliver services that address population health needs**
   - The approach of Population Health Management (PHM) will be adopted. PHM seeks to improve the health outcomes across Nottingham/Nottinghamshire
   - We will utilise current business intelligence to cohort, segment and risk stratify patients by aggregating data to provide a comprehensive holistic picture of patients across the system. This will allow for different commissioning strategies to be applied to suit the specific needs of the neighbourhood populations

6. **Development of Commissioning Approaches**
   - Visions and ambitions describe our intentions at programme level and provide a framework for commissioning
   - Strategic commissioning will increasingly look to commission integrated services through joint or pooled funding arrangements

7. **Commissioning for better outcomes**
   - We will monitor delivery of our ambition through outcome measures aligned to our three aims

8. **Creating the environment for optimum service delivery**
   - Establishing a system architecture for delivery which enables providers to deliver care at the earliest opportunity and in the most local setting that is appropriate
Commissioning Strategy 2019-2022

November 2019
Develop the ICS 5 year implementation plan

April 2020
Establish appropriate governance between the CCG and ICPs

April 2020
Review our existing joint agreements and evaluate effectiveness and value for money

April 2020
Further develop our existing working relationships with strategic partners and establish a formal Joint Commissioning Board

September 2020
Identify or refresh our common priorities and agree appropriate commissioning approaches

2019

2020

2020

2020 - Ongoing

2020

2020

2020

Ongoing

April 2020
Support and facilitate the development of our ICPs (Place) and PCNs (Neighbourhood)

April 2020
Complete the analysis of population health in the initial priority areas and agree use by ICP/PCNs

April 2020 - ongoing
Develop a communication and engagement plan around strategic commissioning plans and delivery

June 2020
Use evaluation to determine what additional capability and capacity is required with strategic partners to deliver joint commissioning - joint development plan

September 2020
Develop our commissioning intentions
